**Konrad Group**  
Toronto, Ontario

Dear Hiring Manager:

I am writing to apply for the Software Developer Co-op at Konrad Group. As someone who is always eager to learn and grow in my field, I believe that this is an excellent opportunity to gain valuable experience and enhance my skills in software development.

I have a deep fascination for developing web and mobile applications, and I am continually learning skills in these areas of development through my personal interest and academic journey. I have worked independently and collaborated with multiple teams on more than 10 projects, gaining experience in many areas of software design and development. In addition to my academic projects, I have successfully completed several personal projects, notably I developed a weather application for iOS, built my personal portfolio using HTML, CSS and JavaScript, and created an obstacle-based game using Java Swing. I have also experience in working on graphical design projects throughout high school, which allowed me to enhance my skills in effective visual communication.

In terms of the specific requirements for this role, I have experience and good understanding in HTML, CSS, JavaScript and iOS Development using Swift. I am enrolled in a Software Engineering Co-Op Program and am currently in my second year. I have used the fundamental principles of SSL and DOM in two of my personal projects and have plans to learn and develop applications in React and TypeScript. My current goal is to rewrite my whole portfolio website using TypeScript and using it more often in my future projects. Besides my current personal projects, I am working in the Software Team of UVic Rocketry Club and contributing to the Ground Support Team in developing Front End components using React Framework. I want to use these skills in a real world setting and I believe Konrad would be a good place to start my career in Software Development.

Given my current work-term setup, I am available for either a 4 or 8-month co-op term and would be open to the possibility of participating in two consecutive terms. Thank you for considering my application. I look forward to the opportunity to further discuss my skills and experience with Konrad Group.

Most Sincerely,

**Arfaz Hossain** (He/Him)  
2nd Year Software Engineering (BSEng) Student,
