Moz Holdings Canada Inc
Vancouver, British Columbia

Dear Hiring Manager:

I am writing to apply for the Software Development Co-op at Moz Holdings Canada Inc. As someone who is always eager to learn and grow in my field, I believe that this is an excellent opportunity to gain valuable experience and enhance my skills in software development.

I have a deep fascination for the potential of technology to solve intricate problems, and I am continually refining my skills in developing efficient and dependable software solutions. Throughout my academic coursework, I have collaborated with multiple teams on diverse projects, gaining experience in different areas of software development. In addition to my academic projects, I have completed several personal projects, including developing mobile applications, building my personal web portfolio, and creating an obstacle-based game using Java Swing. These projects have given me the opportunity to work on my own, and I have developed strong problem-solving and debugging skills in the process.

While reviewing the requirements for the role, I noticed a few areas where my skills align closely. I have a solid foundation in object-oriented principles using programming languages such as C++, Java, and Python as well as experience in mobile application development with Swift and Kotlin. I am working on two separate mobile application development projects and actively working on my portfolio website using HTML, CSS, and JavaScript without relying on any external tools or libraries. Although I don't have direct experience with terabyte-scale databases, building data pipelines, I am confident in my ability to adapt and learn quickly. I am currently enrolled in a software testing course, where I am learning a variety of testing methods and software security techniques. I am genuinely excited about the opportunity to work and contribute my skills and dedication to the team.

Given my current work-term setup, I am available for either a 4 or 8-month co-op term and would be open to the possibility of participating in two consecutive terms. Thank you for considering my application. I look forward to the opportunity to further discuss how my skills and experience can contribute to your team.

Most Sincerely,

Arfaz Hossain
2nd Year Software Engineering (BSEng) Student,
