PCL Construction Management Inc
Edmonton, Alberta

Dear Hiring Manager:

I am writing to apply for the Software Developer Co-op placement at PCL Construction Management Inc. As someone who is always eager to learn and grow in my field, I believe that this is an excellent opportunity to gain valuable experience and enhance my skills in software development.

I have a deep fascination for the potential of technology to solve intricate problems, and I am continually refining my skills in developing efficient and dependable software solutions. Throughout my academic coursework, I have collaborated with multiple teams on diverse projects, gaining experience in different areas of software development. In addition to my academic projects, I have completed several personal projects, including developing mobile applications, building my personal web portfolio, and creating an obstacle-based game. These projects have given me the opportunity to work on my own, and I have developed strong problem-solving and debugging skills in the process.

While my resume may not list experience with some of the preferred technologies, such as C#, .NET, Angular, Typescript, or SQL, I am confident that I can quickly learn and adapt to new technologies and tools. I am currently enrolled in a software testing course, where I am learning a variety of testing methods and software security techniques. I am adaptable and always eager to learn, and I am confident that I can quickly gain familiarity with any new tools or techniques necessary to excel in this role.

Given my current work-term setup, I am available for either a 4 or 8-month co-op term and would be open to the possibility of participating in two consecutive terms. Thank you for considering my application. I look forward to the opportunity to further discuss how my skills and experience can contribute to your team.

Most Sincerely,

Arfaz Hussain
